

Small Business Innovation Research Small Business Technology Transition

Department of Defense Program Overview

August 2018

David Sikora

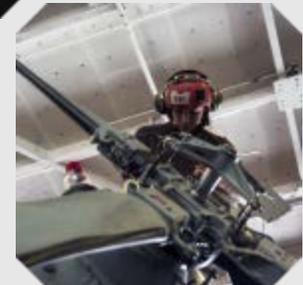

Acting DOD SBIR/STTR Program Administrator

SBIR/STTR Program Goals

Small Business Innovation Research (SBIR) Small Business Technology Transfer (STTR)

- Stimulate Technological Innovation
- Use Small Business Concerns to meet Federal R/R&D needs
- Foster and encourage participation by socially and economically disadvantaged and woman-owned small businesses
- Increase private sector commercialization of innovations derived from federal R/R&D, thereby increasing competition, productivity, & economic growth.
- Stimulate a partnership of ideas and technology between SBCs & Research Institutions through federally funded R/R&D.

Three Phase Program

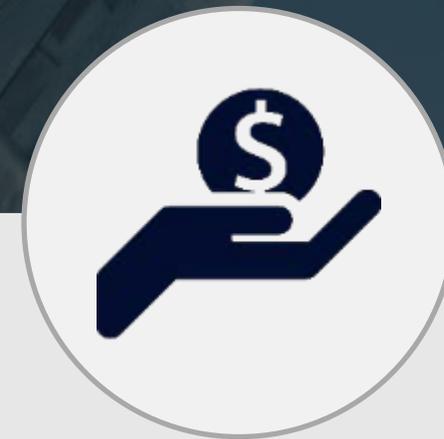

The SBIR/STTR Programs are structured in three phases. Phase I determines the scientific, technical and commercial merit and feasibility of the ideas submitted. Phase II is the major research and development effort, funding the prototyping and demonstration of the most promising Phase I projects. Phase III is the ultimate goal of each SBIR/STTR effort and statute requires that Phase III work be funded by sources outside the SBIR/STTR Program.

Phase I:
Feasibility Study

Phase II:
**Full Research, R&D
to Prototype**

Phase III:
Commercialization

FY2017 Program at a Glance

Starting with:

700+
topics

3
solicitations

~10,000
Phase I proposals

Resulting in:

1,700+
Phase I awards

1,000+
