As an "on-line" resource, the information is limited only by the users interest or need. Some chapters contain general content, they provide individual topic discussions and describe processes and considerations that will improve the effectiveness of program planning. Some chapters may provide a tutorial on the application of these topics to the acquisition framework.

The Defense Acquisition Guidebook is designed to complement formal acquisition policy as described in DoD Directive 5000.01 and DoD Instruction 5000.02 by providing the acquisition workforce with discretionary best practices that should be tailored to the needs of each program. The Guidebook is not a rule book or a checklist and does not require specific compliance with the business practice it describes. It is intended to inform thoughtful program planning and facilitate effective program management.
