GDIT CMMC Strategy

CUI Data Mapping

Cyber Control Maturity

Supplier Outreach &
Governance

Education & Training

GDIT CMMC High Level Roadmap

CUI Data Mapping

- Inventory of programs and suppliers exposed to CUI
- Defined and updated compliance boundary
- Tailored IT and physical protections associated with CMMC

Cyber Control Maturity

- Enterprise IT certified CMMC Level 3 compliant
- Aligned control baseline across environments
- Continuity plan associated with L4 or L5 requirements

Supplier Outreach & Governance

- Increased supplier resiliency and reduced risk of business disruption
- Transparent accounting of supply chain compliance to CMMC
- Leadership position in adopting CMMC

Education & Training

- Informed BU workforce for internal or customer purposes

Supplier/Subcontractor Considerations

CUI Data Mapping

- CUI definition and align policies
- CUI inventory
- Engage prime and sub contractors around CUI
- Data labeling, tagging, classification
- Limit the distribution where not required

Cyber Control Maturity

- Understand maturity target
- Aligned cyber control baseline and policies
- Controls gap assessment
- Plan for multiple IT environments
- Plan for cost and budget
- Communicate limitations

Supplier Outreach & Governance

- Understand affected supply chain partners
- Analyze business pipeline
- Communicate with your suppliers
- Assess impact and risk to supply chain
- Contingency strategy

Education & Training

- Executive awareness
- Industry events
- Program managers
- Technical IT staff
- Contracts and supply chain management
