Gated Process - Three Phases

Solicitation to Award

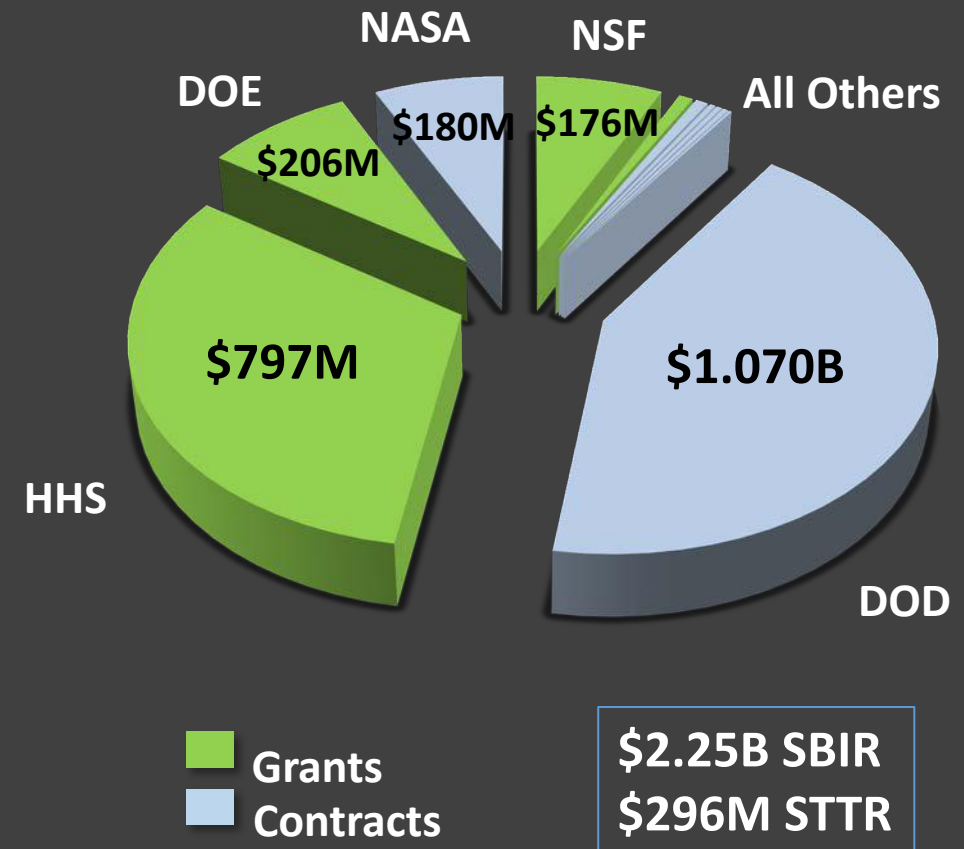

Program Goals

- Meet Federal **research and development needs**
- Increase private-sector **commercialization** of innovation derived from Federal research and development funding
- Stimulate technological **innovation**
- Foster and encourage **participation** in innovation and entrepreneurship by socially and economically disadvantaged persons
- Foster **technology transfer** through cooperative R&D between small businesses and research institutions (STTR)

SBIR/STTR Budget by Agency, FY2015

Agencies with SBIR/STTR Programs	Budget
Department of Defense (DOD)	\$ 1.070 B
Department of Health and Human Services (HHS), including the National Institutes of Health (NIH)*	\$797.0 M
Department of Energy (DOE), including Advanced Research Projects Agency – Energy (ARPA-E)	\$206.1M
National Aeronautics and Space Administration (NASA)	\$ 180.1 M
National Science Foundation (NSF)	\$176.0 M
Agencies with SBIR Programs	Budget
U.S. Department of Agriculture (USDA)	\$20.3M
Department of Homeland Security (DHS): Science and Technology Directorate (S&T) and Domestic Nuclear Detection Office (DNDO)	\$17.7 M
Department of Commerce: National Oceanic and Atmospheric Administration (NOAA) and National Institute of Standards and Technology (NIST)*	\$8.4M
Department of Transportation (DOT)	\$7.9 M
Department of Education (ED)	\$7.5 M
Environmental Protection Agency (EPA)	\$4.2 M

What does an SBIR/STTR firm look like?

- Company must be for profit, U.S. owned and operated, and under 500 people
- Work must be done in the U.S.
- Focus is on performing R&D – Not purchasing equipment, commercializing a technology that has already been developed, or one that has very low risk and only needs capital

Phase III - Commercialization

Justification: Commercializing work that **DERIVES FROM, EXTENDS OR COMPLETES** an effort performed under prior SBIR/STTR agreements, including:

- Activity in the military or private sector
- SBIR/STTR-derived products or services
- Continuation of R&D

Participation

- SBIR/STTR funds **CANNOT** be used for Phase III contracts
- Only businesses that were awarded Phase I or II are eligible to participate in Phase III

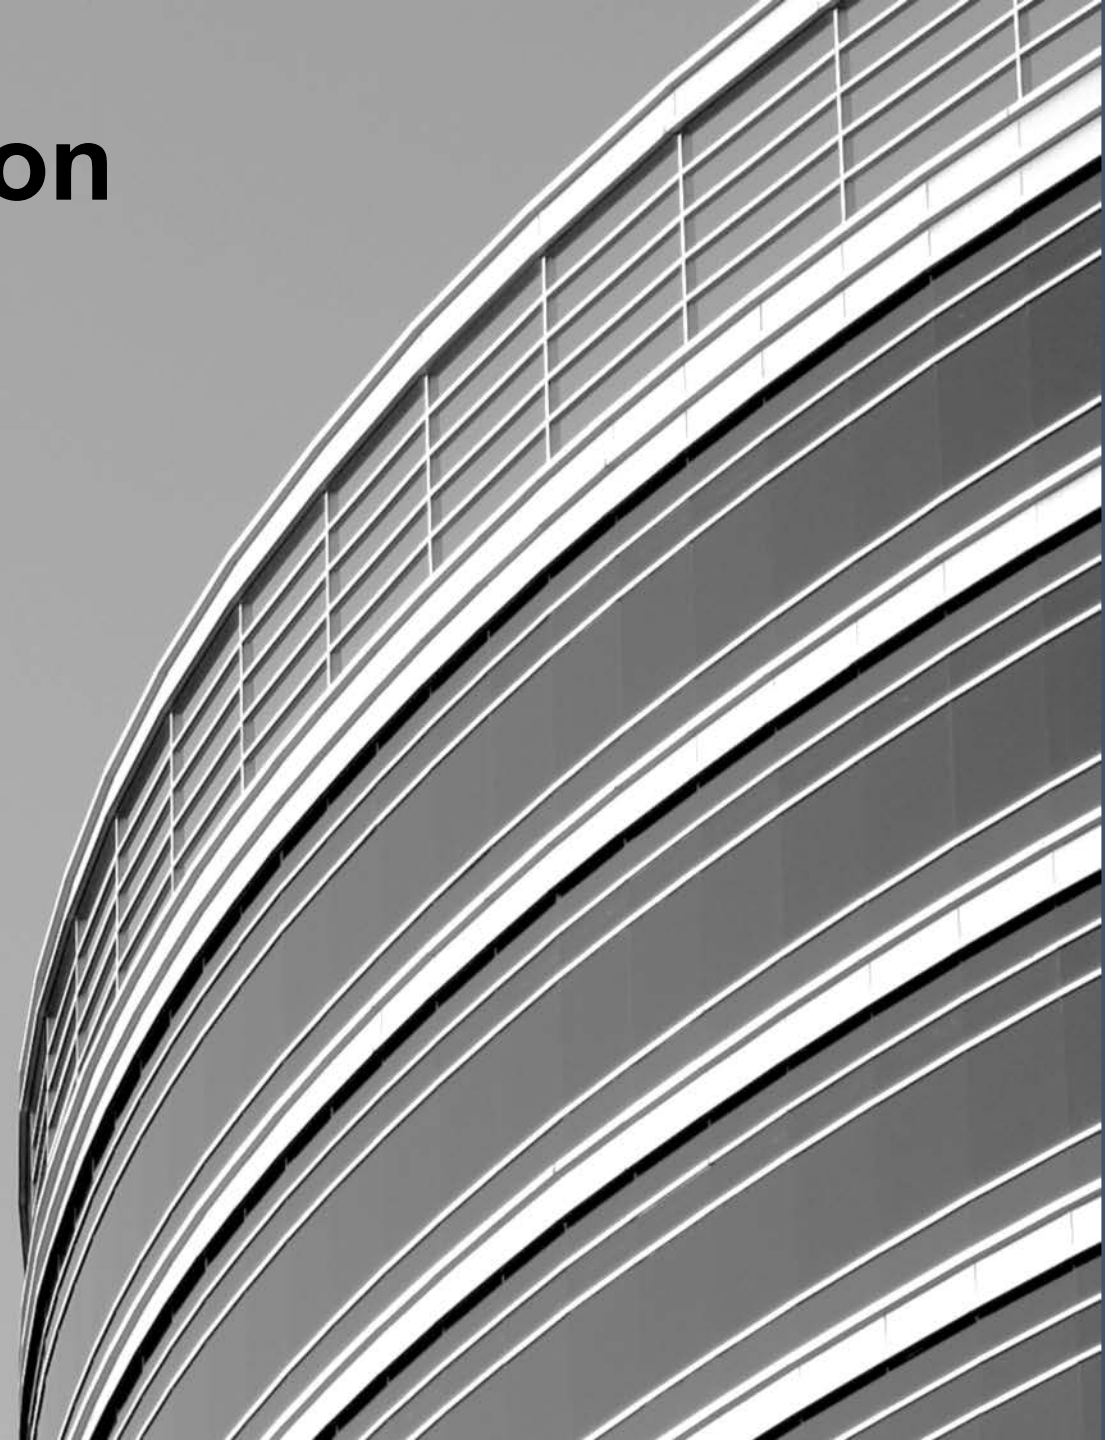

Derives from means that the requirement or contract has its origins in or traces to the previous SBIR efforts of an SBIR firm.

Extends means that the requirement or contract applies or advances prior SBIR efforts to a different application, or uses the prior SBIR efforts in a new way.

Completes means that the requirement or contract involves commercialization or productizing of the prior SBIR

Phase III - Commercialization

- No limit on number, award amount, or duration of Phase III contracts
- May be awarded as Direct Award (we used to say sole source)
- Small business size standards do not apply (a large firm can purchase the SBIR or STTR firm and still receive Phase IIIs for the SBIR firm's technologies because of this exemption from the size standards)
- Subcontracts can be Phase IIIs and Phase IIIs can be subcontracts.

Scenario – Phase III Contracts

Dan: Contracting Officer

Susie: Program Manager

Susie has been working with a small business to develop an encoded 10GHz transmit-receive module for a tactical radio used in battlefield deployment. The small business is near completion of a second Phase II SBIR for development of the prototype module which has passed field testing and is considered to be at technology readiness level (TRL) 8. Susie visits Dan because she wants to issue a follow on award to this company using non-SBIR funding to integrate 20 transmit-receive modules into fielded tactical radios improving functionality.

Can this be done without a competition and why?

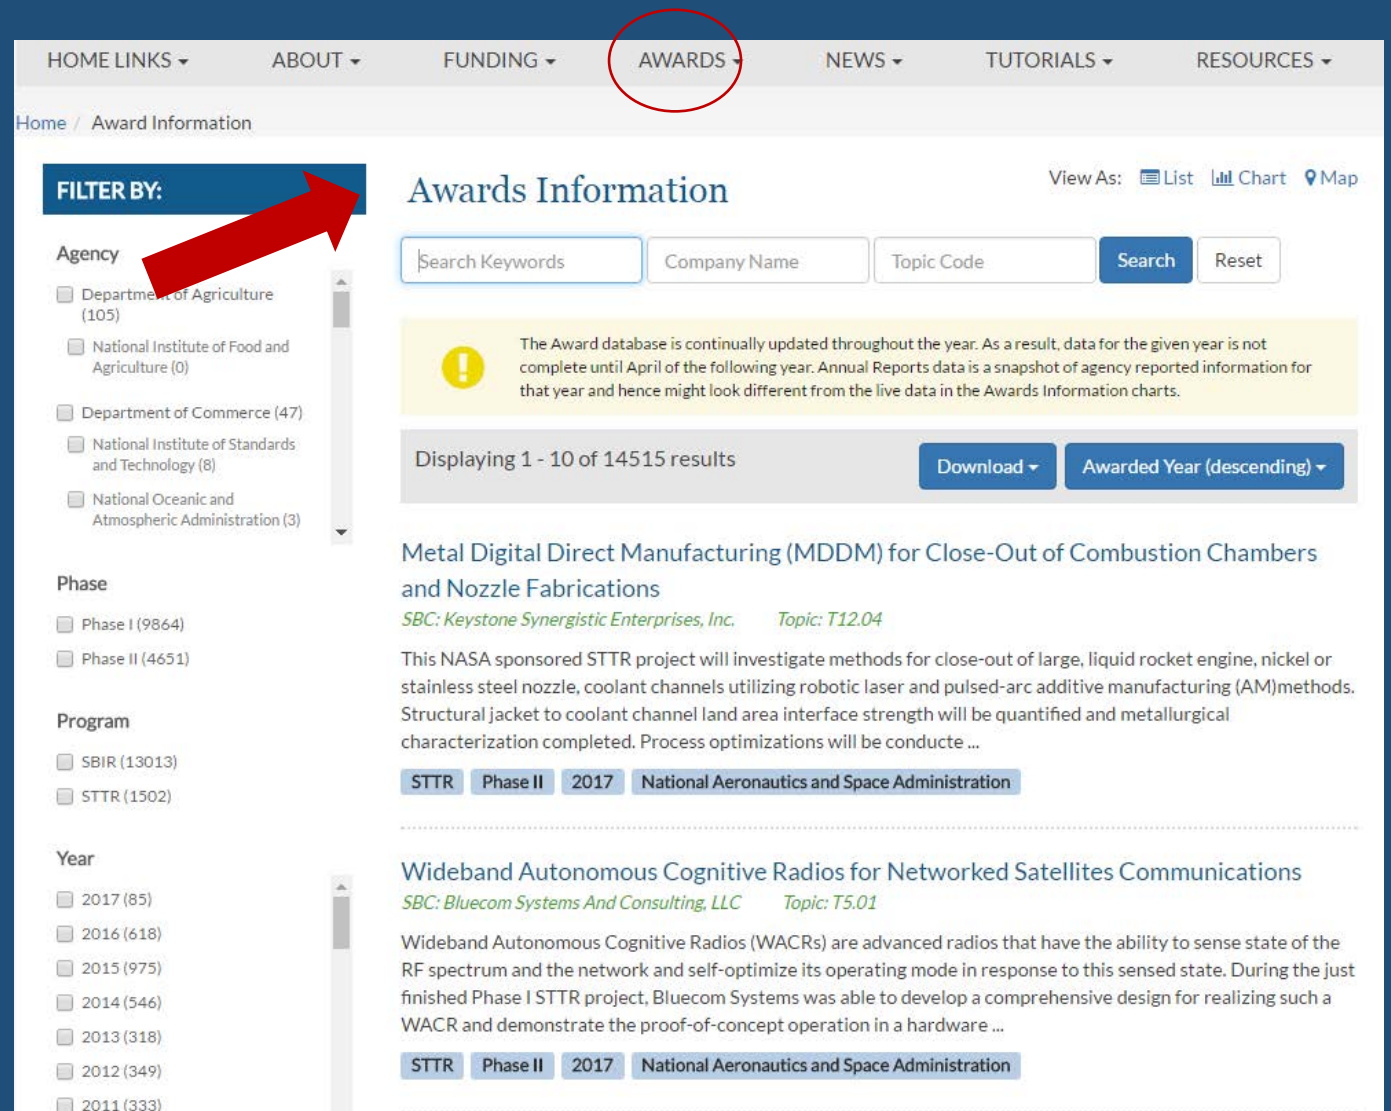

Yes! The work “**derives from, extends, or completes** prior SBIR Phase I or Phase II efforts” and is funded with non-SBIR dollars.

This makes the award a Phase III and competition for the award has already been satisfied.

Metal Digital Direct Manufacturing (MDDM) for Close-Out of Combustion Chambers and Nozzle Fabrications
SBC: Keystone Synergistic Enterprises, Inc. Topic: T12.04

This NASA sponsored STTR project will investigate methods for close-out of large, liquid rocket engine, nickel or stainless steel nozzle, coolant channels utilizing robotic laser and pulsed-arc additive manufacturing (AM) methods. Structural jacket to coolant channel land area interface strength will be quantified and metallurgical characterization completed. Process optimizations will be conducted ...

Wideband Autonomous Cognitive Radios for Networked Satellites Communications
SBC: Bluecom Systems And Consulting, LLC Topic: T5.01

Wideband Autonomous Cognitive Radios (WACRs) are advanced radios that have the ability to sense state of the RF spectrum and the network and self-optimize its operating mode in response to this sensed state. During the just finished Phase I STTR project, Bluecom Systems was able to develop a comprehensive design for realizing such a WACR and demonstrate the proof-of-concept operation in a hardware ...

SBIR.gov - Solicitations

■ Keywords Search

- **Description:** This Method outputs Solicitations (from SBIR.gov database) that contain the Keyword entered in their Topic description.
- **Example:** <https://www.sbir.gov/api/solicitations.xml?keyword=some text without quotes>
- **Return Types:** XML, JSON
- **Fields returned from the API** = title, link, description, agency, close_date, status

■ Agency Search

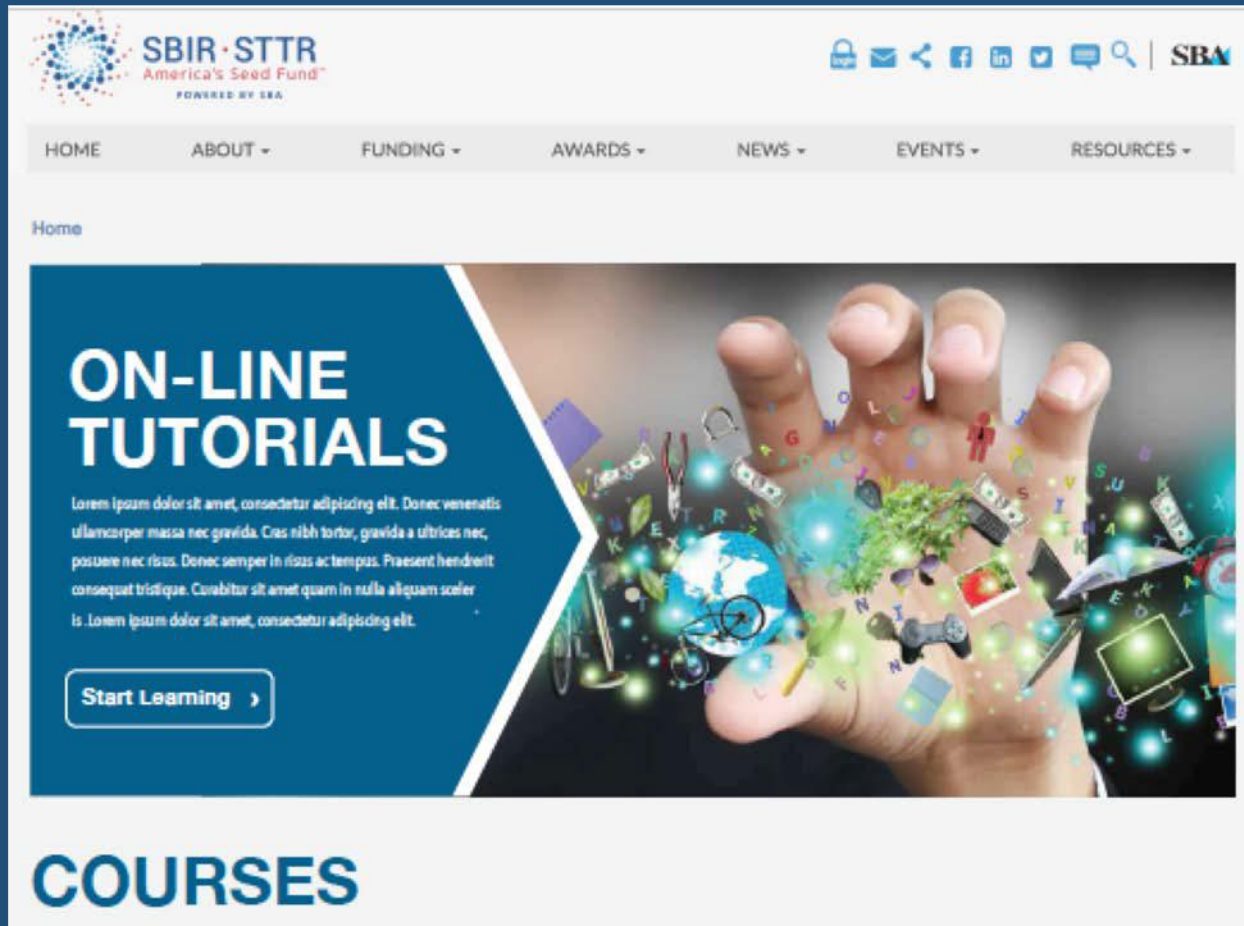

- **Description:** This Method outputs Solicitations (from SBIR.gov database) from an Agency matching the Agency name entered.
- **Example:** <https://www.sbir.gov/api/solicitations.xml?keyword=mars&agency=DOE>
- **Valid values for the agency field:**
 - DOD = Dept. of Defense
 - HHS = Dept. of Health and Human Services
 - NASA = National Aeronautics and Space Administration
 - NSF = National Science Foundation
 - DOE = Dept. of Energy
 - USDA = United States Dept. of Agriculture
 - EPA = Environmental Protection Agency
 - DOC = Dept. of Commerce
 - ED = Dept. of Education
 - DOT = Dept. of Transportation
 - DHS = Dept. of Homeland Security

- **Return Types:** XML, JSON
- **Fields returned from the API** = title, link, description, agency, close_date, status

■ Download all Open

- **Description:** This Method outputs all Open Solicitations recorded in the SBIR.gov database
- **Example:** <https://www.sbir.gov/api/solicitations.xml?keyword=mars&agency=DOE&open=1>
- **Return Types:** XML, JSON
- **Fields returned from the API** = title, link, description, agency, close_date, status
